The EasyTrack Motors are an easy and affordable way to motorize smaller and lighter curtain tracks. The curtain is being transported by a textile transport belt. In case of emergency it can also be moved by hand - without any damage to the system or recalibration.

The motor is being controlled by simple switches or by optional remote control. This motor is based on the Trietex<sup>®</sup> product line of synchronous motors with their well known reliability that lasts so long. Also available as 14 Watts model.
